

Anticoccidial additive

Commercial name

Nicarmix 25® (nicarbazin)

Product description

Nicarmix 25 active ingredient is nicarbazin, which is an anticoccidial agent for broilers and replacement poultry. Exclusively for preventive use.

Product type

Anticoccidial additive.

Composition

250 grams of Nicarbazin per kg.

Indication

For the prevention and control of coccidiosis in broilers, caused by *Eimeria tenella*, *E. acervulina*, *E. maxima*, *E. brunetti* and *E. necatrix*.

How to use

Broilers: mix 400 to 500 grams per ton of feed, and feed them on the 1st day of life up to 10 days prior to slaughter.

Replacement poultry: mix 400 to 500 grams per ton of feed, and feed them from day 1 to 16 weeks of age.

Storage conditions

Store the product in a cool, dry place, sheltered from sunlight, out of reach of children and domestic animals. The product must be prepared at the time of use or daily.

Precautions

The product should be perfectly mixed with the feed. Do not use as a cure to coccidiosis. **Nicarmix 25** should not be fed to laying hens.

Withdrawal period

10 days prior to slaughter.

Presentation

25kg bag.
