

# **PHI-CHROME™** Chromium Tripicolinate

PHI-CHROME™ Chromium Tripicolinate, from Phibro Animal Health Corporation, is included in our portfolio of mineral and nutrition specialty products. Due to only minimal amounts of chromium being absorbed from the diet (0.5 - 2.0%; respectively)<sup>8</sup> and therefore available to the animal, supplementation with organic chromium ensures increased bioavailability of this essential nutrient.<sup>9</sup>

#### **PHI-CHROME:**

- Brought to you by Phibro Animal Health
- Organic source of chromium
- Two concentrations available (0.40 and 0.04%)

#### **BENEFITS of Chromium**

- + Helps improve glucose metabolism<sup>8 11</sup>
- + Tripicolinate is more bioavailable in swine tissue<sup>6</sup>
- + Helps reduce mortality<sup>10 12</sup>
- + Helps increase muscle percent<sup>4</sup>

## **PHI-CHROME Chromium tripicolinate**

*Superior source of organic chromium for swine*

Research has shown an increase in chromium bioavailability may lead to:

### **Sows**

- Increase in live pigs born<sup>1</sup>
- Increase in total piglets born<sup>1</sup>
- Decrease in stillborn and mummified piglets<sup>1</sup>
- Improved first service farrowing rate<sup>2 10</sup>
- Reduced abortions<sup>10</sup>
- Reduced sow deaths<sup>10</sup>

### **Grow-Finish**

- Increased gain and carcass quality<sup>6</sup>
- Increased longissimus muscle area<sup>7</sup>
- Reduced percent of total fat and increased percent of muscle<sup>4</sup>
